2025

Pada 10 Juli 2025, Selwa Shipyard, sebagai anggota konsorsium TMS Shipweld, mencapai tonggak penting dalam program ekspor pembangunan kapal dengan pemasangan konstruksi rangka pertama untuk dua kapal cepat serang rudal (ICR-70M) untuk Angkatan Laut Indonesia. Upacara ini menandai transfer dari fabrikasi lambung awal ke perakitan struktural penuh dari kapal sepanjang 79 meter tersebut.

LEN Industri Dashboard

Progressive Web App Dashboard untuk Partner Management, Analytics & AI Intelligence

Next.js 16 React 19 TypeScript 5 Supabase PostgreSQL Drizzle ORM Groq LLaMA 3.3 70B

Tentang Project

Dashboard analytics untuk LEN Industri — holding industri pertahanan Indonesia (DEFEND ID) — yang menampilkan data mitra strategis secara real-time dengan kecerdasan buatan terintegrasi.

Fitur Utama

Dashboard Visualisasi

- KPI Metrics — Total partners, companies, countries, quadrant distribution
- World Map — Distribusi geografis partner (React Leaflet)
- Scatter Plot — Executability vs Economic Return analysis
- Industry Matrix — Klasifikasi kuadran perusahaan
- Asta Cita Bar Chart — Distribusi partner per program prioritas
- Network Graph — Supply chain industri (React Flow, 109 nodes)
- Contact Cards — Direktori kontak partner
- Company News — Feed berita internal

AI & Integrasi Eksternal

- AI Chatbot — Groq API (llama-3.3-70b-versatile) dengan akses data dashboard real-time
- External News — RSS feed aggregator (rss.app / feed langsung)

Infrastruktur

- Realtime Updates — Supabase Realtime WebSocket dengan auto-reconnect (exponential backoff)
- PWA — Installable di mobile, tablet, desktop
- Google Sheets Sync — Apps Script automation (setiap 1 jam)
- Type-Safe — Full TypeScript + Drizzle ORM

Quick Start

1. Install Dependencies

```
bun install
```

2. Setup Environment Variables

```
cp .env.example .env.local
```

Edit `.env.local` :

```
# Supabase (required)
NEXT_PUBLIC_SUPABASE_URL=https://yourproject.supabase.co
NEXT_PUBLIC_SUPABASE_PUBLISHABLE_KEY=your-anon-key
DATABASE_URL=postgresql://postgres:password@db.yourproject.supabase.co:5432/postgres

# Groq AI Chatbot (required untuk fitur AI)
GROQ_API_KEY=your-groq-api-key

# RSS Feed External News (optional)
RSS_APP_FEED_URL=https://www.defensenews.com/arc/outboundfeeds/rss/
```

3. Setup Database

1. Buat project di <https://supabase.com/dashboard>
2. SQL Editor → copy & run isi `docs/DATABASE_SCHEMA.sql`
3. Verifikasi 7 tabel terbuat

4. Run Development Server

```
bun run dev
```

Buka <http://localhost:3000/dashboard>

Tech Stack

Layer	Technology	Keterangan
Framework	Next.js 16 (App Router)	SSR + RSC + PWA
UI	React 19 + TypeScript 5	Type-safe components
Styling	Tailwind CSS 4	Via <code>postcss.config.mjs</code> (no <code>tailwind.config.ts</code>)
Components	shadcn/ui	Button, Card, Badge, Input, etc.
ORM	Drizzle ORM	Type-safe queries, auto-inferred types
Database	Supabase PostgreSQL	Row Level Security enabled
Realtime	Supabase Realtime	WebSocket + exponential backoff reconnect
AI	Groq API (<code>@ai-sdk/groq</code>)	llama-3.3-70b-versatile, streaming
AI SDK	Vercel AI SDK v6	<code>@ai-sdk/react</code> , <code>DefaultChatTransport</code>
Charts	Recharts	Scatter plot, bar chart
Maps	React Leaflet	World map dengan divIcon markers
Network	React Flow (<code>@xyflow/react</code>)	Supply chain graph
Tables	TanStack Table	Industry matrix
RSS	Native fetch + XML parsing	Edge-compatible, no external parser
Package Manager	Bun	Gunakan <code>bun</code> bukan <code>npm</code>
Deployment	Vercel	Serverless, Cache Components

🔗 Halaman

Route	Deskripsi
<code>/dashboard</code>	Executive Summary — semua visualisasi
<code>/dashboard/partners</code>	Direktori kontak partner (full card view)
<code>/dashboard/news</code>	Company news feed internal
<code>/dashboard/external-news</code>	RSS feed berita industri eksternal
<code>/dashboard/chatbot</code>	AI assistant berbasis Groq + data dashboard

Commands

Development
bun run dev # http://localhost:3000/dashboard

Build & Lint
bun run build # Production build + type check
bun run lint # ESLint

Database (Drizzle)
npx drizzle-kit generate # Generate migrations
npx drizzle-kit migrate # Apply migrations
npx drizzle-kit studio # DB GUI
npx drizzle-kit push # Push schema (dev only)

Environment Variables

Variable	Required	Keterangan
NEXT_PUBLIC_SUPABASE_URL	✓	URL project Supabase
NEXT_PUBLIC_SUPABASE_PUBLISHABLE_KEY	✓	Anon/public key Supabase
DATABASE_URL	✓	PostgreSQL connection string (server-side)
GROQ_API_KEY	✓ untuk chatbot	Dari https://console.groq.com (gratis, 14.400 req/hari)
RSS_APP_FEED_URL	Opsional	URL RSS feed untuk External News
RSS_APP_API_KEY	Opsional	Hanya jika pakai rss.app authenticated API

🔗 Arsitektur Data

AI Chatbot — Cara Kerja

1. Setiap request ke `/api/chat` melakukan query ke semua tabel utama (metrics, negara, kuadran, Asta Cita, news terbaru)
2. Data diinjeksikan ke system prompt sebagai konteks
3. Groq streaming response dikembalikan via `toUIMessageStreamResponse()`
4. Client menggunakan `useChat` dari `@ai-sdk/react` dengan `DefaultChatTransport`

Server vs Client Components

- **Server Components:** Semua halaman dashboard (fetch data via Drizzle)
- **Client Components:** Leaflet Map, NetworkGraph, ScatterPlot, ChatInterface, RealtimeDashboard
- **Realtime:** `RealtimeDashboard` wrapper panggil `router.refresh()` saat ada perubahan DB

Database Schema

7 tabel dengan Row Level Security:

Tabel	Deskripsi
<code>companies</code>	Perusahaan mitra (nama, negara, produk)
<code>partners</code>	Kontak individu (linked ke company)
<code>quadrant_data</code>	Skor executability & economic return (kuadran 1–4)
<code>asta_cita_data</code>	Jumlah partner per kategori program
<code>network_nodes</code>	Node supply chain (Len / mitra lokal / luar negeri)
<code>network_edges</code>	Relasi antar node
<code>news_feed</code>	Berita perusahaan dengan FK ke companies

Deployment (Vercel)

```
vercel --prod
```

Environment variables di Vercel Dashboard → Settings → Environment Variables:

```
NEXT_PUBLIC_SUPABASE_URL
NEXT_PUBLIC_SUPABASE_PUBLISHABLE_KEY
DATABASE_URL
GROQ_API_KEY
RSS_APP_FEED_URL      (opsional)
```

Troubleshooting

Map tidak muncul / `appendChild` error

```
rm -rf .next && bun run dev
```

Map menggunakan pattern SSR-safe: semua react-leaflet di `LeafletMap.tsx` + `dynamic({ ssr: false })` + `mounted guard`.

TypeScript: Cannot find module VS Code: `Ctrl+Shift+P` → "TypeScript: Restart TS Server"

DATABASE_URL is not set Cek `.env.local` ada di root folder dan restart dev server.

Realtime timeout Dashboard akan auto-reconnect dengan exponential backoff (5s → 10s → 20s → 40s → 60s, max 5 retries).

AI Chatbot tidak merespons Cek `GROQ_API_KEY` di `.env.local`. Key gratis tersedia di <https://console.groq.com>.

Status Project

Completion: ~100%

- ☑ Type-safe database dengan Drizzle ORM (7 tabel, 19+ query functions)
- ☑ Dashboard dengan 7 visualisasi
- ☑ Realtime subscriptions + auto-reconnect
- ☑ Partner contacts page
- ☑ Company news page
- ☑ External News (RSS feed)
- ☑ AI Chatbot (Groq + Llama-3.3-70b)
- ☑ PWA manifest + icons
- ☑ Responsive design (mobile/tablet/desktop)
- ☑ Google Sheets integration ready

Version: 2.0 Last Updated: April 2026 Stack: Next.js 16 · React 19 · Drizzle · Supabase · Groq AI · Vercel AI SDK v6

Built for LEN Industri — Holding of DEFEND ID
